

Kingsdale Tree Grille

The Kingsdale Dales Collection Tree Grille is manufactured entirely in the UK from Stainless Steel. They are supplied in 2 halves and inserted into a Type 1 Support Frame, which stabilises the grille, preventing shrinkage and subsidence of the tree pit. The Kingsdale can be installed with a Dales Collection tree guard. To install the Kingsdale with a tree guard a Type 2 Support Frame is required, see 'Support Frames' specification sheet for further details.
